

Ziegler Speaks To Kiwanis Club

Charles M. Ziegler, state highway commissioner, was the speaker at Monday night's meeting of the Kiwanis Club of Grayling. He introduced Lt. Governor Earl R. Burns who in turn presented the Commissioner to the club.

The meeting brought out about 70 Kiwanis club members and their guests. Included in the guest list was Mayor A. L. Roberts, members of the Crawford County Road Commission, A. L. Hull, County Road Superintendent and J. Hurley Russell, County Road office clerk.

Commissioner Ziegler told of his feelings of the needs of good highways in northern Michigan to aid the state's great tourist industry. He likewise explained how the lack of funds was hindering the department in its plans for the building of new and better highways for the state.

He traced the picture of the state's highways through the war years when new construction was prohibited through the postwar years when strikes caused a scarcity of road building materials to the present day when highway construction costs have mounted by more than 130 percent.

The Commissioner explained that to build a mile of concrete highway in 1941 cost about \$40,000, today the cost is in excess of \$100,000. A divided highway costs about \$300,000 to \$350,000 a mile to construct and the expressway type of highway ranges from \$350,000 to \$500,000 per mile to build.

He explained the movement to widen the toll road or turnpike throughout the various states. Commissioner Ziegler also pointed out that several states had sold huge bond issues to finance the construction of new highways. Michigan is building roads much more economically than all the other 48 states; the Commissioner stated even in the face of longer building weather in the south and cheaper labor costs there.

"It was much enjoyed by the club and was most informative."

On Tuesday, a group of 50 Kiwanians gathered at the AuSable River Inn for a divisional meeting. This group represented clubs throughout northwestern and central Michigan. The session was conducted by Lt. Governor Burns and opened at 4 p. m. A dinner was held at 6 p. m. at which time a large number of local club members joined the group.

How can you know what your next hospital bill will cost you?

You can't know! You can't predict other \$10 a day ... \$15 a day ... any limited amount per day will a care of the hospital bill that r family has a 1 in 3 chance facing this year!

Unpredictable as hospital bills, there is one reliable and easy to protect your family adequately inst "catastrophic" expense that exceed even \$50 a day!

Get the protection that provides a check for \$10 or \$15 a day, but bed and board, the drugs and loines, the operating room, and the other hospital services you need!

Get Blue Cross protection!

Not for profit, Blue Cross is sorsored by the hospitals and doctors selves. It is the most successful as ever devised for meeting the blem of paying hospital bills.

No wonder over 3,000,000 Michigan ple have Blue Cross. Chances are, r neighbor is protected the Blue as way. Talk it over with him ... see if he doesn't agree that there no finer protection at any price!

**How Blue Cross protects you.** Blue Cross Comprehensive Group Plan assures you of a wide range of hospital services ... such as bed and board, expensive extras like operating room, drugs and medicines, oxygen and so forth. And every enrolled member in your family is protected the same way at over 200 Blue Cross participating hospitals in Michigan alone!

**How Blue Shield protects you.** Unlike paying hospital bills, you can find out in advance what your doctor's charges will be. The thing you can't find out is when you'll need a doctor's services, and here is where Blue Shield protects you.

Blue Shield offers two basic plans—one, a straight surgical plan, the other, a medical-surgical plan. Under either plan, Blue Shield pays generous, specific amounts directly to your doctor for thousands of surgical procedures, including maternity care. And in non-surgical cases, under the medical-surgical plan, Blue Shield also pays liberal amounts for your doctor's visits to you in the hospital. Often the doctor's full bill is covered.

**The cost is low.** Only pennies per day! You can help keep costs low ... by using Blue Cross-Blue Shield only when neces- sary. Please do not ask your doctor to put you in the hospital for diagnostic treatment which could just as easily be performed in his office.

**How to get Blue Cross - Blue Shield.** Ask your employer or union representative how you can get low-cost Group Enrollment. A company with as few as five em- ployees may qualify as a Group. Check your Farm Bureau or Grange. Contact your nearest Blue Cross-Blue Shield office.

**BLUE CROSS-BLUE SHIELD have more Michigan members than all other plans combined!**

**Guarantee of Value**

All of us naturally like to find bargains. All of us, when shopping, try to get top return for each dollar spent. And in the long-run, the surest way to achieve that is to patronize established merchants who are concerned with the future—not just today's sales.

That was the theme of an editorial in the Garner, Iowa, Leader. The paper advised its readers:

"In any hometown, the reputable merchants and dealers will be the kind of people that you like and trust."

This editor does not think you will lose any peace of mind or money if you rely on them for good values at a fair price. I am sure you will find this procedure is much safer and simpler than searching for bargains in strange places.

Many a "bargain," bought at an alleged big discount from some fly-by-night operator, has proven worthless.

The established local merchants, chain and independent, have to protect their reputations — and that's your best guarantee of value.

"Future historians will have cause to rejoice in the fact that at a critical time in the history of the world, the free system of the United States had the strength to safeguard the forces of freedom and democracy. Without this power, it is questionable if any of the free peoples could have protected their freedom." — Grayson Kirk, President Columbia University.

By BETH JUDSON

That television! My kids are  
glued to it!

"Television," retorts Josette  
Frank, "is a wonderful new de-  
vice that the ingenuity of man  
has given us. Why deplore it? Why  
not make the most of this new  
art form?"

As Educational Associate of  
the Child Study Association of  
America, Josette Frank has made  
it her business to observe chil-  
dren viewing TV. Although she  
comes up with no pat answer to  
that complaint "too much TV"  
(family situations are all so dif-  
ferent, she points out), Miss  
Frank does offer a couple of sug-  
gestions that many parents have  
been grateful for:

Work out a time budget with  
your children—one that allows  
a reasonable time for viewing.

With an eye toward homework,  
household chores, music practice,  
outdoor play and such, decide  
what would be a reasonable  
amount of time for daily viewing  
—and which programs they want  
to see.

If you do this planning to-  
gether, children will feel they  
have a stake in the idea and  
they'll find it a lot easier to live  
up to. Be willing to make excep-  
tions once in awhile, too. If a  
special program should clash with  
dinner time, for example, occa-  
sionally let them have their meal  
on a tray in front of the TV set.

See that your children enjoy  
 plenty of other activities.

"A child with lots of interest-  
ing things to do," Josette Frank  
observed, "doesn't usually find  
TV an irresistible lure."

Copyright 1953, Mental

But if he isn't able to keep  
busy? Then TV itself can be a  
source of help. You may, for in-  
stance,

... look through program list-  
ings yourself now and then.  
There may be a nature or science  
or some other worthwhile pro-  
gram that will inspire children  
to begin a new hobby, or find a  
new interest.

... suggest that they make  
hand-puppets and carry on dra-  
matic plays as TV puppets do.  
(You have to provide the mak-  
ings, of course.)

... drop a hint that it might  
be fun to put on plays based  
on favorite TV characters. This  
gives children good creative ex-  
perience.

... watch for programs that  
call for children's participation,  
such as making things with their  
hands, drawing, modelling, or  
even cooking.

... point out that sometimes  
it's nice to read a book on which  
a TV play is based. This may  
help them discover what fun  
reading can be.

You have to be a full-time  
mother, Josette Frank admitted,  
to use TV for its plus values in  
ways like this. And you have to  
lead children — tactfully. Not  
push. Nor go at it with a this-  
is-good-for-you attitude.

"Handle TV rightly," she con-  
cluded, "and you can turn this  
new instrument of communica-  
tion into a wonderful new tool  
for helping children taste the  
joy of being actively interested  
in many things."

**BOY SCOUT NEWS**

About 32 Boy Scouts had a  
weiner and marshmallow roast at  
Hartwick Pines Tuesday evening,  
April 20th. They met at the Le-  
gion Hall at 6:30 P. M. and were  
taken to the Pines in cars by  
Ernest Larson, Ronnie Larson, Bud  
Halstead, George Schiabe and  
Wm. LaRush.

The Boy Scouts wish to thank  
the following business places for  
15 lbs. of hot dogs, 8 dozen buns,  
12 boxes of marshmallows, 6 cases  
of pop: A. & P. Store, Burrows  
Market, Black & White, Long's  
Market, Meech's Grocery and  
Grayling Bottling Co.

The boys played ball and were  
happy to have as the umpire  
Jimmy Schafer. They were glad  
to have Jim with them for the  
first time in quite a while as he  
had been a polio patient at Mun-  
son Hospital, Traverse City. Even  
though Jim is sporting crutches  
he did a bang up job of umpir-  
ing.

## America's lowest priced low-friction SIX!

**FORD'S NEW I-BLOCK SIX IS THE MOST MODERN SIX IN THE INDUSTRY...THE ONLY LOW-FRICTION SIX IN ITS FIELD!**

More folks are swinging to Ford's 115-h.p. I-block Six because they're getting the most modern six in the industry. Ford's short-stroke, low-friction design means less gas waste, less wear and longer engine life.

The extra-deep, "I-shaped" block means a more rigid, quieter engine. And the new high-turbulence combustion chambers, and Ford's Automatic Power Pilot, bring you even more "GO" per gallon.

**ONLY FORD OFFERS BOTH A V-8 AND SIX IN THE LOW-PRICE FIELD!**

**HERE'S WHAT FORD'S LOW-FRICTION DESIGN MEANS TO YOU**

**LONGER ENGINE LIFE.** Both new Ford engines are of short-stroke design. This means pistons travel less distance. Naturally, there is less friction and less wear. In both engines overhead valves have a free-turning feature which allows them to rotate to cut down wear.

**MORE POWER.** Because there is less friction to overcome in moving pistons up and down, there is more energy to move the car. And because combustion chambers are wedge-shaped, fuel burns more completely... for even more power.

**MORE "GO" PER GALLON.** Ford engines also bring you the additional savings of the Automatic Power Pilot which squeezes the last ounce of power out of every drop of gas. You won't find any of the modern advances on this page in any other low-priced car.

Worth more when you buy it...worth more when you sell it!

Only one grade...America's greatest gasoline value

## WINS AGAINST "PREMIUMS" AT INDIANAPOLIS TEST

The Test: New Blue Sunoco was tested against 16 premium-priced gasolines at Indianapolis Auto Track. Each day of test, 16 cars (including cars with highest-compression engines) were fueled with \$3 worth of gasoline, driven around track 'til tanks ran dry. Miles each car went were recorded. The fleet of cars was run on New Blue Sunoco and all 16 "premium" gasolines.

The Results: New Blue Sunoco—at regular gas price—beat them all! It gave up to 14.9% (average: 10.4%) more miles than the premium-priced brands tested. Famed Wilbur Shaw, President of Indianapolis Motor Speedway Corp., personally supervised the test.
